Know what's below *Dial 811 before you dig*

Whether you plan to do it yourself or hire a professional, summer is an optimal time of the year to dream up and achieve your landscaping masterpiece. If any of your projects require digging—such as planting trees or shrubs, or setting posts—smart digging means calling 811 before each job.

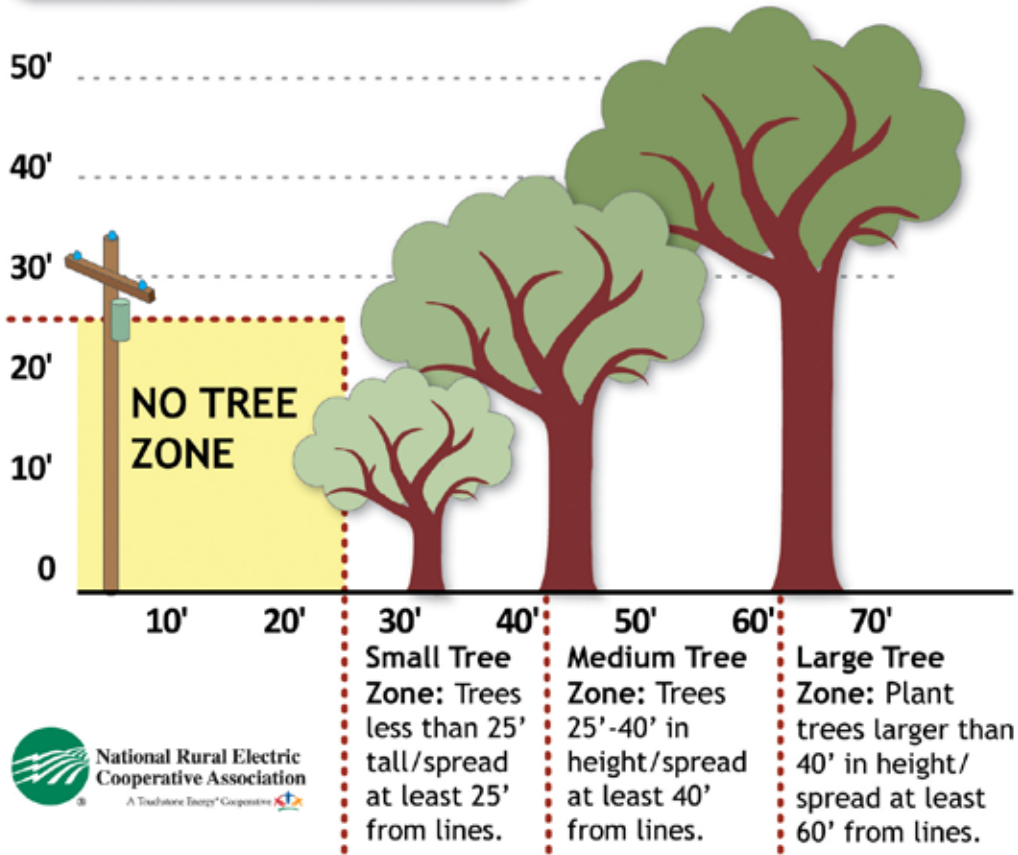

Underground utilities, like buried gas, and water and electric lines, can be a shovel thrust away from turning a summer project into a disaster. **Dial 811, the national “Call Before You Dig”** phone number, at least 48 hours before starting any type of excavation work. A locator will arrive to designate the approximate location of underground lines, pipes and cables. These areas will be marked with flags or paint so you'll know what's below. Then the safe digging can begin.

Never assume the location of underground utility lines. There's no need: the 811 service is free, prevents the inconvenience of having utilities interrupted and can help you avoid serious injury.

**Know what's below.
Call before you dig.**

Tree Planting Guide

Show You Care with FirstCall.

Jed is an equipment operator for the Co-op. He cares about his dad, and he shows it every day by giving him FirstCall. With FirstCall, Jerome can summon help with a press of a button.

Jerome thinks Jed is pretty special. We think so, too.

Call Sonja today to ask about FirstCall.
